

TORIboard	3
KAMISHIBAI board	4

TORIboard

TORlboard

- TORlboard is the application that digitizes department whiteboards. Compatible with touch screens, desktops and digital whiteboards.
- The TORlboard digital whiteboard algorithm measures the effectiveness of meetings based on user interactions.
- The integrated system for updating KPIs and opening improvement actions allows Team Leaders to reduce the time needed to make decisions and take countermeasures.

Start on time

Has a predefined duration

Participants interact

Decisions are made

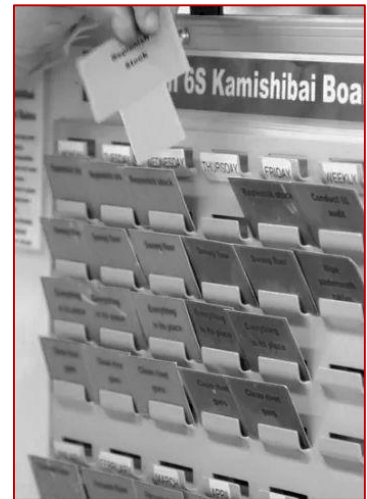

KAMISHIBAI board

KAMISHIBAI board

- The idea of using the kamishibai board was introduced by Toyota, to create a visual control system that was simple and intuitive
- Workers and supervisors use kamishibai cards to carry out regular and systematic inspections
- The cards ensure that all areas are checked regularly, identifying deviations and encouraging continuous improvement of the areas

Watch Now

With this App, launching a verification Kanban is done in 4 phases and takes less than 10 minutes:

1. Create the Kanban
2. Set the frequency and category
3. Add photos and questions
4. Perform audits and monitor team progress
