Approvep

- The Approvep is a trailer with an electric platform that lowers to the ground in seconds. Fully assisted, the operator takes no risks and loads with ease.
- INNOVEP adapts the dimensions of the cells (length, width, height) and the required payload according to each need.
- Its function is to transport carts or roll containers already present on the production site to the production line ("Milk Run"). It allows the transfer of specific carts, wheeled platforms, roll containers, waste containers or pallets, loaded and unloaded with a manual pallet jack or a combination of these.
- The Approvep is suitable for both indoor and outdoor use with its pneumatic version. It is perfectly single-track and quiet.
- This mother, entirely designed and manufactured in France by INNOVEP, undoubtedly allows for a significant productivity gain for the factory and an incomparable comfort of execution for the operator.

Approvep Light

Watch Now

- The Approvep Light is a lighter version of the Approvep while retaining the qualities that make the latter successful.
- It facilitates lean manufacturing while limiting costs compared to the original Approvep trailers and adapts very well to both indoor and outdoor passages.
- The Approvep light version is available with options such as:
- Protective roof,
- Sliding side tarpaulins or roller shutters,
- Etc …

Distrivep

- The Distrivep consists of an electric tractor, a standard trailer train and adaptable bases or wheeled trolleys, which serve as both platforms and tool carriers.
- The Distrivep solution replaces forklifts with small, multi-purpose, single-track trains that move between the warehouse, preparation areas, and production stations.
- Semi-automatic loading allows the operator to effortlessly load parts weighing up to one ton.
